## Message from our President & CEO

Dear Friends,

It's my pleasure to bring you our new issue of *Inside Deborah Magazine*, our periodic publication that highlights news at Deborah Heart and Lung Center and Deborah Hospital Foundation.

In these pages you will meet a generational range of patients, who each in their own way puts a personal face to National Men's Health Month. You will meet a teenager who received unexpected health news at a high school student heart screening; a Board Member who needed mid-life cardiac care from a congenital cardiac anomaly; and a patient who required and received emergency cardiac surgery. These three stories illustrate that at any point in our lives, Deborah's interventions can be truly life-saving.

This magazine issue also serves as our 2014 Annual Report. This is an opportunity for us to share financial information with our supporters, as well as recognize those donors whose generosity has continued to make our mission of providing care for all a reality.

It is impossible to embrace a mission like ours, and not have financial challenges. In the course of our 93-year history we have had to work tirelessly to not only provide funding for our mission, but to also maintain the highest possible standards of care, technology, and innovation. Despite these challenges, we have continued to persevere and yes, even thrive.

Deborah may not be able to measure success in financial terms as many other hospital systems and foundations who do not share our mission, but we will remain a *rich* hospital. A hospital *rich* in history, *rich* with overflowing compassion and kindness, and *rich* with the knowledge that we have done all that is possible to help our fellow citizens keep and maintain their health. As Gandhi said, "It is health that is real wealth, not pieces of gold and silver."

With this in mind, it is gratifying to look at our financials, and see the hard work of on-going strategic planning and execution that has brought new patients and revenue streams to our hospital. These healthcare initiatives, focusing on complementary services to address health problems that affect cardiovascular health – like diabetes, bariatrics, wound care, and lung cancer – continue to grow the Deborah brand. Along with programs developed around healthy living and wellness, and our increased presence in the community, all bodes well for the future of our organization.

The Foundation through its diligent efforts, had another strong year of gifts and donations enabling the Center to continue and sustain its mission, and for which we are so grateful!

I hope you enjoy this issue, and I **thank you** for your continuing support of both our medical and humanitarian mission. Deborah is truly a hospital with heart!

**Deborah Hospital Foundation  
 Mission Statement**

*To provide substantial funding to support the highest quality of patient care by Deborah Heart and Lung Center, to provide for treatment of children with congenital heart disease in the United States and around the world; and to provide for clinical research for cardiac, pulmonary and vascular diseases by fostering and maintaining the Foundation's grassroots volunteer movement, its alliances with corporations, labor organizations, service organizations, foundations and others and by its initiation and enhancement of planned giving programs and other fundraising activities. In partnership with the Center, the Foundation will continue to heighten awareness of the name of Deborah and its unique healthcare and fundraising activities to serve more people without distinction as to race, gender, sexual preference, creed, color, religion, age, national origin, handicap, or ability to pay.*

# Patients Find Relief Through State-of-the-Art Wound Healing Technology

For the estimated five million Americans suffering with chronic wounds, technology holds a remarkable promise. At The James Klinghoffer Center for Wound Healing and Hyperbaric Treatment, Deborah is providing sophisticated wound care technology and oxygen therapy to enhance healing through a multidisciplinary team approach.

These treatments apply the best proven wound care practices and advanced clinical approaches to heal patients suffering from chronic wounds. Deborah's expansive program provides state-of-the-art integrated care for slow-healing wounds.

When a patient needs integrated wound-healing management -- including standard treatment such as debridement, advanced dressing, compression therapy and nutritional support -- or more sophisticated treatment like Hyperbaric Oxygen Therapy, which exposes the entire body to 100% oxygen under

**During the Center's first complete year, they conducted 2,279 patient visits and 868 hyperbaric treatments.**

increased atmospheric pressure, The James Klinghoffer Center for Wound Healing and Hyperbaric Treatment is the region's premier destination.

**"Our wound healing center offers the most comprehensive program in the region for patients who have slow healing wounds. For those of us who care for these patients, we know how devastating this condition can be. To finally have a program that reaches into every aspect of wound care is extremely welcome. To be able to provide meaningful relief and healing to these patients is one of the most gratifying experiences for us."**

# The Power of Corporate and Foundation Philanthropy

Deborah Hospital Foundation is grateful for the generous support of the corporate and foundation community. Through our corporate and foundation relationships continued commitment, countless innovative advancements are achieved at Deborah Heart and Lung Center. Here at Deborah, our primary importance is providing quality healthcare for our patients while establishing strong community, corporate and foundation collaborations.

Our corporate and foundation partners ensure the hospital's ability to provide safe care, effective care and exceptional service to every patient, every family, every day. Deborah Hospital Foundation raises funds needed to support many areas within the hospital with an annual focus on: patient care, medical equipment and program support. The generosity of donors enables us to provide specialized patient care, faster diagnoses, more efficient treatment plans and exceptional outcomes for all patients.

Gifts and grants from corporations and foundations are vital to ensure that Deborah can continue to advance our capabilities while providing these needed services. We partner with foundations and corporations for matching gift programs, sponsorships, grants and other fundraising ideas. We work closely with our partners to develop "a perfect match" with grantees, by sharing ideas, maintaining open communication and fostering a sense of community. We continue to identify partners who share our values and strategic priorities. To the Deborah Hospital Foundation, there is power in collaborating to achieve a common goal of creating positive, healthy change at Deborah Heart and Lung Center.

Please turn to page 17 to see a list of the organizations, corporations and foundations that supported us in 2014.

# Giving the Gift of Time

There is a special group of people at Deborah Heart and Lung Center who collectively represent the backbone of the entire organization.

These notable people are the compassionate volunteers who each have a unique and personal story about their Deborah experience. These volunteers provide an invaluable service to patients, families, visitors, and staff, making the hospital a brighter place for everyone.

One of these volunteers who works “behind the scenes” -- rather than up front like the more visible “Red Coat” Volunteers -- is Rocco Di Giacomo, who has been a tireless volunteer since 2003. “As a member of the community you should give back and this is a great place to do it,” he explained.

Born and raised in Paterson, NJ, Rocco spent his teenage years shining on the soccer and baseball fields, playing alongside skilled athletes from countries throughout the world. After high school he went on to earn a B.S. in Math Education and an M.S. in Mathematics from Fairleigh Dickinson University. He then went on to a successful teaching career at Rancocas Valley High School where he taught until his retirement in 2003.

Unfortunately, in 1997 Rocco was diagnosed with Atrial Fibrillation (AF) - - a condition that produces irregular and rapid heartbeats. About 40 pounds overweight, Rocco remembers profusely sweating and having trouble breathing while doing simple tasks that did not require a lot of physical exertion. “It was beginning to affect my life at work and at home,” he explained. As a father of three and grandfather to nine, he had a very active life. “My heartbeat had to go back to a normal rhythm.”

He underwent treatment in 1997. Just a few months later his heart went back to its irregular heartbeat. Then Rocco went through multiple cardioversions administered on two separate occasions, but each time the low-energy shocks to his heart turned out to be ineffective. He finally decided to come to Deborah Heart and Lung Center.

“BOOM! The first try and it was back to a regular rhythm and I was fixed for more than five years,” he explained, regarding his first visit to Deborah.

Because of his positive experience at the hospital, Rocco and his friend Gary Frantz -- a colleague and fellow grateful patient at Deborah - - decided in 2003 to begin volunteering at the hospital. “We felt like we owed them for what they did for us; they treated us like family.”

The two have been volunteering in the marketing department ever since.

Rocco and Gary remain optimistic and committed to giving back to the Deborah community. The staff agrees that they have brightened every day they have had the privilege of working with them. Deborah is proud to call both Rocco and Gary “family.”

If you are interested in being a Deborah Volunteer, contact Cyndy Kornfeld, Director, Volunteer Services at 609-893-3372.

# A Continuum of Care for Men's Health

*"I am so thankful for the Deborah Hospital Staff! God Bless Deborah!"*  
*For decades this expression of gratitude has been echoed by our patients, their loved ones and friends. Most recently it was repeated by three men of varying generations: adolescence, middle-aged and senior citizen, whose lives have been altered through interactions with Deborah.*

## The "LIFE" of a teenager

Brendan is a typical 16 year old teenager--an energetic, physically fit basketball and soccer player with good grades, a bright future and a positive outlook on life. Last September he attended Deborah Heart and Lung Center's Sudden Cardiac Arrest Prevention Program at Cherokee High School. Deborah, in conjunction with Simon's Fund, offered free, comprehensive cardiac evaluations to all adolescents within the school district. During Brendan's evaluation, Deborah clinicians uncovered a congenital heart abnormality known as "Bicuspid Aortic Valve," which is a defect in the heart's aortic valve.

Most parents never think to have their children's hearts tested because symptoms are rarely present. Unfortunately, as we read all too often, certain undetected cardiac abnormalities can result in Sudden Cardiac Arrest, in most

cases striking down a seemingly perfectly healthy child. Historical data suggests Sudden Cardiac Arrest occurs with one in 200,000 children. However, recent, more accurate studies suggest the incidence may be four or five times greater. Today, these unnecessary deaths and undiagnosed conditions are detectable and preventable with comprehensive heart evaluations. From a parent's perspective, the death of even one child...is too many.

Along with Brendan, more than 250 other students were seen by Deborah's clinical staff. Approximately 10% of the students were then further evaluated with an echocardiogram (ultrasound of the heart). Of this group, 10 students, including Brendan, presented

## From a baby to the Boardroom – A lifetime with Deborah

Robert Birnbaum, 51, was born with two holes in his heart – a congenital heart defect which, left untreated, often results in childhood mortality. As a member of the Deborah Foundation's Passaic Chapter, his mother Libby knew of the hospital's extraordinary reputation. Therefore, immediately after leaving the maternity ward, the Birnbaums headed to Deborah. Through an exploratory procedure, Deborah's pediatric cardiologist determined Robert was not at risk now, but would most likely need open heart surgery within a few years.

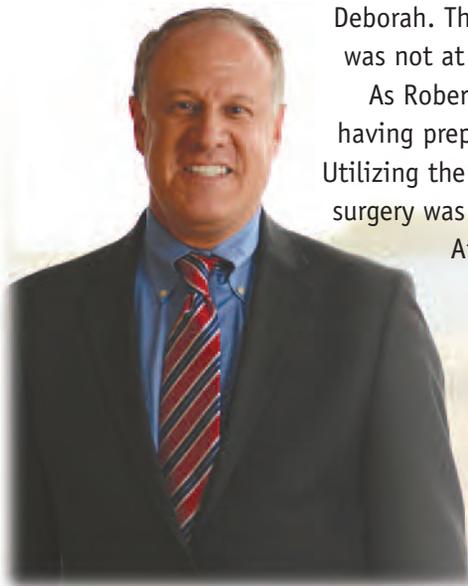

As Robert approached his 4th birthday, he was back at Deborah. His nervous parents, having prepared themselves for the ordeal of their toddler son's surgery, were given a reprieve. Utilizing the state-of-the-art technology available at Deborah, the cardiac team determined his surgery was not needed at that time, sparing both Robert and his parents, pain and worry.

After a week in the hospital, Robert was discharged and brought home.

As young parents, the bills from Robert's care could have financially devastated the family. But, through generous gifts from our donors, the Deborah Foundation assists the hospital in removing the financial burden for all of Deborah's patients. Quite simply, Deborah does not want anyone to make a medical decision based on their personal financial situation.

Over the next 40 years, Robert remained under the watchful care of Deborah's cardiologists. It wasn't until 2008 he finally underwent successful open heart surgery to repair his heart.

*continued...*

### *The "LIFE" of a teenager ...continued*

significant enough findings for them to be referred to a pediatric cardiologist for a more in-depth evaluation. In Brendan's case, he was seen by his pediatric cardiologist, cleared for all his athletic activities and went on to be named the Offensive MVP for Cherokee High School's junior varsity soccer team.

Brendan's mother Paula states, "Our family is fortunate we decided to participate in Deborah's program and to heed the physician's advice to follow up with a pediatric cardiologist. Brendan is now aware of his condition, but he refuses to let this define him." A junior at Cherokee, he is using his experience to inspire others to get screened. "I hope by sharing my story, more kids will get tested. If just one person gets diagnosed who previously didn't know they had a heart issue, then it was worth sharing this very private matter with the public," Brendan related.

*Note: Brendan is looking forward to the upcoming soccer and basketball seasons and fully intends to participate in college athletics once he graduates.*

---

### *From a baby to the Boardroom ...continued*

Over his lifetime Robert has given generously of his time and resources to Deborah. In June 2015 Robert was elected as the Chairman of the Foundation Board after serving as Secretary since 2009. As President and Treasurer of the Clifton Chapter, with Life Memberships in the Greater Pompton Area, Clifton and Point Pleasant Chapters he remains an active volunteer and chairs various fundraising activities benefiting the Foundation.

Robert proudly exclaims, "As a professional with an accounting and banking background, I can assist Deborah by seeking out new fundraising opportunities which will help us remain cost-conscious in times of managed care cutbacks. I am truly honored to be affiliated with Deborah and feel my service on the Board of Directors is one way of giving back for the incredible care I've received for more than 40 years."

### **Carpe Diem!**

"Walking into Deborah Heart and Lung Center last week was a much better way to see the place than the way I arrived three years ago!"

As an emergency patient being rushed in on a stretcher, Emory Turnure's heart was failing and he was dying. He remembers the kind face and the reassuring voice of a nurse named Debbie who told him, "I'm going to take good care of you, don't worry." He was then rushed into surgery where Deborah's Cardiac Surgical Team performed successful open heart surgery, saving Emory's life.

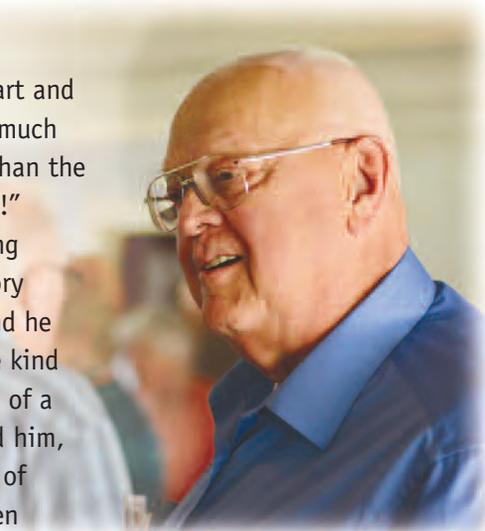

Prior to the surgery Emory had a very weak and very inefficient pumping heart. This condition is not only frightening, but also greatly diminishes your quality of life. Since his successful operation and cardiac rehab, Emory continues to see Deborah cardiologists for his follow-up care. His health has greatly improved, his medications are properly balanced and his quality of life has been enhanced dramatically.

Emory, now 75, enjoys and appreciates every opportunity that comes his way. He loves to travel, attend Deborah Foundation lunches, and volunteers to speak as a grateful patient about his experiences at Deborah. He remains a strong advocate for the Foundation and gives of both his time and treasury to support the missions of the Foundation and the hospital. He is a member of the Foundation's Heritage Circle, which is a group of selfless individuals who have generously remembered Deborah Hospital Foundation in their estate plans.

"Today, I feel blessed to be able to visit Deborah and hug ALL the nurses – there were so many who so compassionately cared for me, and helped my family to understand what was happening. I always take the time to tell them how much I appreciate what they did to help me stay positive and focus on the light at the end of the tunnel. They are all like family to me."

Today, Deborah remains the region's top choice in the delivery of high quality specialized care in the fields of cardiology, pulmonology and vascular medicine. From a baby's very first soft heart beat to the beat of an elder more experienced heart, Deborah's expert clinical staff remains a life-saving resource for thousands of patients each year.

"Knowledge is power...only if you have it and use it." For Brendan, Robert and Emory knowing and managing their personal health means every day is a gift and they now live each one with purpose and appreciation. It's your heart; it's your life, which is why you should always Demand Deborah!

**To learn more about your own health, make an appointment with a cardiologist at Deborah by calling 609-621-2080.**

# Giving More Than You Think You Can-

## *Life insurance, an often overlooked way of making a gift*

If you're like most people, you probably think of life insurance as a way to ensure that your loved ones will be taken care of when you're no longer here; and that's true. But surprisingly, life insurance can also be an easy and affordable way to make a very meaningful gift to Deborah. A life insurance policy can allow you to make a much larger gift than you might have ever thought you could. Although the cost to you (your premiums) is relatively small, the ultimate gift you make to Deborah can be quite substantial.

### ***Naming Deborah as Beneficiary***

This is the easiest and most affordable way to make a significant impact on Deborah. Just request a "change of beneficiary" form from your insurance company and name Deborah Hospital Foundation as first, second or contingent beneficiary of your policy. You simply continue to pay your premiums, if needed. While you don't receive a current income tax deduction, your estate tax is reduced by the amount that ultimately comes to Deborah. Beneficiary designations allow you the flexibility to modify them as your circumstances change. They are a wonderful way to make a meaningful difference.

### ***Gifting an Existing Insurance Policy***

You may have a whole or universal life policy that you once acquired for other reasons. These can make very tax-effective charitable gifts. Simply contact

your insurance company and name Deborah Hospital Foundation as the sole owner and sole beneficiary of your policy.

You get the satisfaction of creating a significant legacy for a cause you believe in and a charitable tax deduction for your policy's fair market value. You continue to make any needed premium payments and receive additional deductions for each.

*Please note:* all noncash gifts over \$5,000 require an appraisal for deductions.

We encourage you to talk to a financial professional or your attorney to explore other ways life insurance products may provide solutions for your charitable and estate planning objectives.

Please call the Foundation at 609-893-0100 before making any insurance gift or if you have any questions.

**We're here to help answer any inquiries you may have. Please call Jim Carson or Ellen Krivchenia at 609-893-0100.**

# Services Offered

## ADULT CARDIOLOGY

Inpatient and outpatient comprehensive cardiovascular evaluation and interventions

Cardiac Catheterization Laboratories:

- Angioplasty
- Drug-eluting stents
- Valvuloplasty

Noninvasive Cardiology:

- Echocardiogram

PET/CT imaging technologies

SOMATOM Definition Flash CT Scanner

Nuclear Medicine/Cardiology:

- Non-stress and stress testing

Adult Congenital Heart Disease Program

Women's Heart Center

## AMBULATORY CARE SERVICES

Out-patient appointments and second opinions available with Deborah specialists

Evaluation and follow up for all services and programs

40-room, state-of-the-art Ambulatory Care Center

Same Day Procedure Unit

Auxiliary and consulting physicians

## BALANCE CENTER

Diagnosis and treatment of dizziness and balance issues

- Vestibular rehabilitation and physical therapy

## BARIATRIC SERVICES

Duodenal Switch

Gastric Bypass Surgery

Gastric Sleeve Surgery

Revisional Surgery

Gastric Banding Surgery

## CARDIOTHORACIC SURGERY

Cardiothoracic surgical evaluations

Coronary artery bypass grafting  
Valve repair, replacement  
Combined valvular and coronary procedures  
Re-operative cardiac surgery  
Off-pump Coronary Artery Bypass Graft Surgery (OPCAB)

Surgical repair of aortic (great vessel) aneurysm/dissection

Adult congenital heart surgery

Transmyocardial Revascularization (TMR)

Radial artery harvesting

Tissue and mechanical valve implants

Percutaneous cardiac assist devices

Endoscopic vein harvesting

Total arterial revascularization

Minimally-invasive aortic valve replacement

Valve surgery re-operation

Pericardial procedures (window)

Myomectomy procedures

## ELECTROMECHANICAL THERAPY INSTITUTE

Inpatient and outpatient comprehensive evaluation of patients with LV dysfunction, congestive heart failure and complex arrhythmias

Radiofrequency ablation for atrial fibrillation

Dedicated Outpatient Clinic:

- Congestive heart failure
- Arrhythmia
- Syncope and device therapy
- Electrophysiology Laboratory:
  - Complex arrhythmia ablation
  - Cardioversion
  - 3D Mapping System and Magnetic Robotic Navigation System for ablations

Pacemaker and ICD implantation for standard indications

Device implantation for emerging indications in heart failure

Defibrillator Lead Extraction

## INSTITUTE FOR SLEEP MEDICINE

Diagnosis and treatment of over 84 forms of sleep disorders

- Sleep apnea syndrome
- Insomnia-primary and secondary
- Narcolepsy
- Sleep movement disorders
- Sleep deprivation syndromes

## INTERVENTIONAL CARDIOLOGY

Full Spectrum of Coronary Procedures

- Diagnostic catheterization and coronary angiography
- Complex coronary interventions, including chronic total occlusions and left main disease
- Intravascular ultrasound, OCT and fractional flow reserve (FFR)
- Femoral and radial access for procedures
- Impella left ventricular assist device

Peripheral Procedures-Angiography and interventions to open arteries from head to toe

- Carotid
- Subclavian
- Renal
- Mesenteric
- Iliofemoral
- Below the knee arteries

- Limb salvage procedures for critical limb ischemia
- Alternative access (including popliteal pedal access for complex anatomy, peripheral chronic total occlusions)

#### Venous Disease

- Varicose veins
- Deep vein thrombosis
- Pulmonary emboli
- IVC filter placement

#### Aortic Interventions

- Percutaneous Endovascular Abdominal Aortic Aneurysm Repair

#### Congenital Procedure—Percutaneous Structural Interventions

- Atrial septal defects (ASDs) closure
- Patent foramen ovale (PFO) closure
- Patent ductus arteriosus (PDA) closure
- Ventricular septal defect (VSD) closure

#### Structural Heart Disease

- Paravalvular leak closure
- Left atrial appendage closure (LARIAT)
- Percutaneous aortic valve replacement (TAVR)
- Mitral valve repair (Mitral Clip)

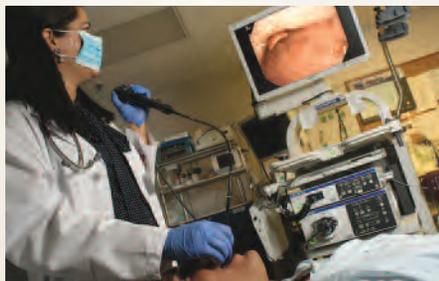

#### Cardiovascular Research:

- >30 coronary, peripheral and structural studies (including renal denervation) in follow-up (detailed list available upon request)

### JOSLIN DIABETES CENTER

#### AFFILIATE AT DEBORAH

Complete Evaluation by Diabetes Specialist  
Nutrition Education  
Diabetes Self Management Training

### PEDIATRIC CARDIOLOGY

Outpatient comprehensive diagnostic and treatment services  
Pediatric echocardiography  
Pediatric arrhythmia management  
Perinatal cardiology

### PULMONARY MEDICINE AND RESPIRATORY DIAGNOSTICS

Inpatient and outpatient comprehensive evaluation

COPD

Interstitial and Occupational Lung Disease

Diagnostic Evaluation

Outpatient Pulmonary Rehabilitation Program

Pulmonary Function Laboratory

Pulmonary Exercise Studies

Pulmonary Disability Evaluations

Smoking Cessation

Bronchial Thermoplasty

Lung Cancer Screening Program

Multi-Disciplinary Oncology Program

### SOUTH JERSEY AORTIC PROGRAM

Stent/graft repair of abdominal aortic aneurysm

Thoracic stent graft repair of thoracic aortic aneurysm

Use of high-level imaging for following aneurysms

Management of general surgery needs including abdominal issues, airway, and venous access

### THORACIC (LUNG) SURGICAL PROCEDURES

Pulmonary resections (wedge, lobectomy, pneumonectomy)

Variety of minimally-invasive stapler devices

Mediastinal procedures

Lung volume reduction surgery

Thoracoscopic lung surgery

Chest wall procedures

Pleural procedures

Tracheal procedures

### VASCULAR SURGICAL SERVICES

South Jersey Aortic Program

Full range of traditional open vascular surgical procedures

Treatment of venous diseases with both open and endovascular techniques

Thoracic stent graft repair of thoracic aortic aneurysm

Carotid stenting/Carotid endarterectomy

Dialysis access surgery

Distal bypass surgery of lower extremities

Open and endovascular limb salvage procedures

### VEIN CENTER

Treatments for chronic venous insufficiency, varicose veins, spider veins, and Deep Vein Thrombosis

- Radiofrequency Ablation using VNUS Closure
- Sclerotherapy
- Phlebectomies
- Venous stasis ulcer treatment

### WOUND HEALING AND HYPERBARIC TREATMENT

Hyperbaric Oxygen Therapy (HBO)

Negative Pressure Wound Therapy

Bioengineered skin substitutes

Arterial and venous pumps

Angioplasty and stenting

Wound matrix and collagen dressings

Growth factors

Ultrasonic debridement

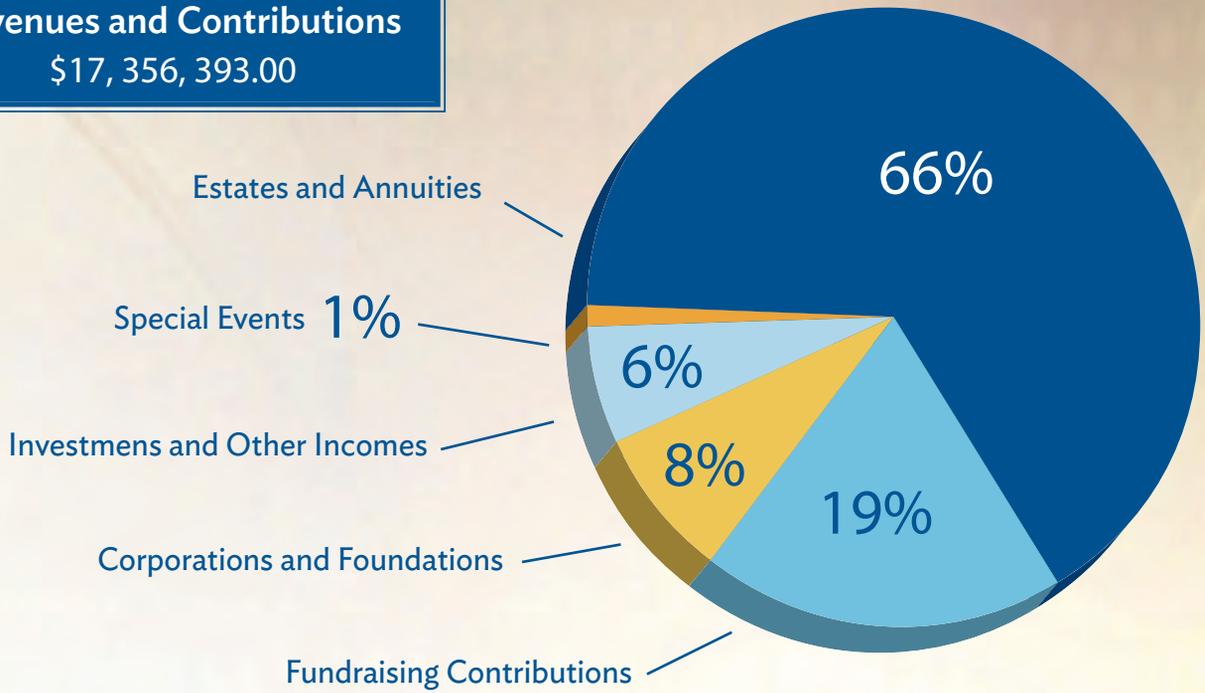

Total contract casting epidermal harvesting
